

## **Contractor's A License – City of Winnipeg**

*"This was by far the toughest exam we have written to gain a contractor's license. We are both Master Electricians and have contractor's licenses in British Columbia, Alberta, and Ontario. Cory and I both passed the exam in Manitoba! We definitely could not have done it without taking the course you put on. So thanks again for that." **S. Salekin, Operations Manager, Seltrek Electrical Solutions, Alberta***

Hi Anne,

*"I got word yesterday that I passed the Electrical Contractors exam! The course was exactly what I needed to get back into the code book and up to speed. Much appreciated! Thanks for all the help with the practise questions, they really helped me navigate both books quickly." **Devin, a self-employed Electrician***

An electrical contractor's license allows an individual to perform electrical work governed by the City of Winnipeg Electrical By-law and to pull permits. To qualify for a City of Winnipeg electrical contractor's license, you must be a journeyman electrician with an "H" license.

The Thomson Training Solutions 12-hour prep course prepares you to challenge the City of Winnipeg exam. Our classes help you navigate the Electrical Code Book and City of Winnipeg By-laws. We offer mock exam questions and review how the questions are weighted, review challenging math calculations, and more. Questions are sent to you in advance of the course and then marked, with new practice questions leading up to the course so it is important to register early.
