

Contractor's C License –Low Voltage License - City of Winnipeg

New course offering!

This course will be of interest to those technicians who already have the Voice Data Video "M" license through the Province of Manitoba and want the additional Contractor's C License to pull City permits when working on multi-unit, apartments, and/or commercial buildings.

Our 12-hour class will help you navigate the Electrical Code, and City of Winnipeg By-laws, review math calculations and formulas, offer mock exam questions and offer test-taking strategies. We purposely hold our classes just before the exam to help you retain this valuable information.
